REMARKS:

1. Appended is a document you are not going to like. It adds piquancy -- and urgency to our conversation of Wednesday, 20 May.

2. I think we can handle this through the procedure we agreed on, though the matter will have to be shoved from the back burner to the front. It seems to me the Adams' study should be telepouched to the field accompanied by a cable explaining the Kissinger request, the deadline (which I may be able to get stretched) and the need for detailed comments. I will call you after I get back from USIA to discuss further.
